

Shane Fast

Shane Fast joined Prince Rubber & Plastics, Inc. in February 2013 as a Senior Technical Engineer for Prince in the area of Chlor-Alkali/Chlorate/Bleach Pulp Industries. Shane has a wealth of knowledge and experience in the chlorine industry. He was an engineer at PPG, Lake Charles for 10 years and was a Vice President for the Chlorine Institute for 6 years. His experience in the chlorine industry includes production engineering in membrane, diaphragm (asbestos and synthetic), and mercury cell. Shane was the operations representative and commissioning manager of the mercury-to-membrane conversion project at PPG Lake Charles which started up on time and within budget in 2007.
